Address For Your Lead Gen Sites

How to get an address for your Lead Gen Sites/Business?

Below are some of the best ways to get a good address for your GMB (Google My Business) listings.

1. Type your city + virtual mailbox into Google.

You can either try location based service providers using the above method, or go with companies like:

<https://physicaladdress.com/>

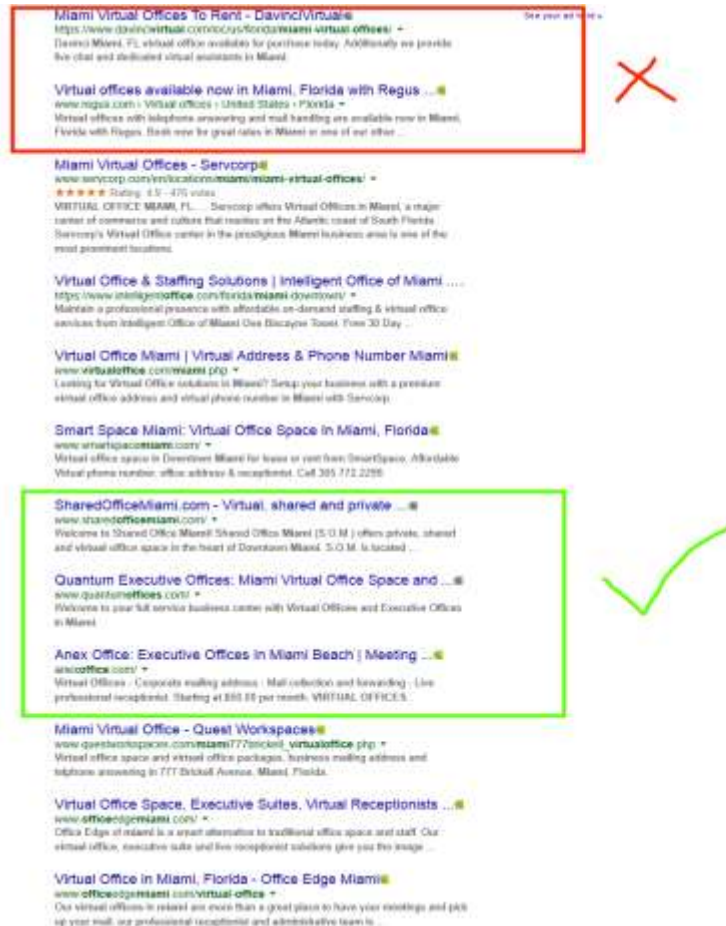

<https://firstpostbox.com/>

<https://ipostal1.com>

There are other services and locations and it's likely that you will find one to suit your needs.

2. Type City + Virtual office

For example, let's do a search Virtual Office in miami , fl
location: **Miami, florida virtual office**

Note:

You want to choose more obscure virtual offices. The listings above with the **red X** beside them are well known, worldwide. If you were to choose those providers, Google will easily tag you if you use the addresses from these providers.
